YOUR RELIABLE PARTNER FOR MEDICAL AND NON-MEDICAL DISPOSABLE AS WELL AS REUSABLE PRODUCT - SINCE 2015

With this attitude, we have developed into a renowned manufacturer brand. From the beginning, we have built and strengthened our worldwide partnerships on the pillars of reliability, flexibility and trust. Our daily activities are characterised by a wide range of products, short delivery times, high quality assurance and a price-performance ratio in line with the market. As an expert for disposable as well as reusable products, we also ensure that our NITRAS articles and all the private labels we manufacture are always state-of-the-art and fully marketable. We have internalised these values in our NITRAS family and continue this important tradition to this day. Our personal as well as customer- and solution-oriented approach combines the above-mentioned aspects, creating a unique combination that serves as the basis for steady growth. Side by side with our partners.

Our goal is to pRedect people's health and the environment and to make life easier. We work on this every day with great reliability, flexibility and competence. We strive for a full range of disposable as well as reusable products for professional medical and non-medical application areas, that is always available for everyone and delivered to a desired location within the shortest possible time. Trends, designs, innovations and the current state of the art are incorporated into product development just as much as a price-performance ratio in line with the market. Because with the purchase of a NITRAS article, we want to give people a promise. A promise in terms of features and quality that makes our brand value tangible and thus develops a comprehensive and distinct brand awareness.

In addition, we are determined to offer constantly optimised customerspecific and individual solutions that meet our high standards.

In our NITRAS family, we are committed to continuous, partnership-based and healthy growth. In this context, economic, ecological and social aspects are to be considered and implemented along the entire value chain. Based on our personal advice and high level of commitment, we want to develop a successful and future-oriented business policy that serves the well-being of all people and the environment.

YOUR ADVANTAGES

- ✓ Many years of experience
- ✓ Outstanding expertise
- ✓ Sustainable quality assurance
- ✓ Excellent price-performance ratio
- ✓ Certified and monitored products (voluntary and statutory)
- ✓ Professional and timely handling of private labels
- ✓ Strong network
- ✓ Continuous expansion of the product range
- ✓ Shortest delivery times from stock
- ✓ Support for your sales activities
- ✓ Sustainability Task Force
- ✓ Own office in Shanghai, China

Our goal is to pRedect people's health and the environment and to make life easier.

BRANDS THAT CONNECT US

The relevance and sales figures of private labels have been increasing continuously and across all sectors for years. It is therefore currently no longer possible to imagine the shelves of supermarkets and DIY markets without private labels, because the advantages for the trade are significant.

ADVANTAGES FOR THE TRADE

On the one hand, the trade has more liberties with pricing policy thanks to private labels. On the other hand, private labels are perfectly suitable for distinguishing and defining one's own assortment from the competitors. In addition, private labels can be used to create product innovations that bring out the main points and add new products to the range.

PRIVATE LABELS WITH NITRAS

With us you do not only benefit from the advantages mentioned above. In addition, we can offer you an all-round carefree package on request, so that you can fully concentrate on your business and sales.

Benefit from our experience and know-how regarding medical and non-medical disposable as well as reusable products:

- ✓ We conduct the certification process for you and take care of all technical documents and specifications
- ✓ All products comply with the requirements of German and European legislation
- ✓ Strong network in Asia
- ✓ High quality assurance on site (own office and employees in Asia)
- ✓ Timely and professional handling of your private labels
- ✓ Support with promotional material

We would like to support you in implementing your goals with private labels, strengthening and profiling your market position and distinguishing your product range according to target groups - contact us!

REALISING PRODUCT INNOVATIONS

ALL-AROUND CAREFREE PACKAGE

STRENGTHEN MARKET POSITION

QUALITY IS OUR TOP PRIORITY

This applies not only to features such as materials, fit and pRedective function, but also to the freedom of the products from harmful substances and allergens. The latter plays a very important role in consumer and environmental pRedection.

OUR QUALITY MANAGEMEN SYSTEM

Our quality assurance begins with the raw materials of which our products are made of. This includes the inspection of raw materials and testing for risk parameters. As part of our supplier management, our suppliers are trained and informed on an ongoing basis (e.g. by means of questionnaires and training materials) so that we can ensure that all parties involved are informed about current events in the EU and to achieve consistent and high manufacturing quality. We check compliance with our requirements by means of on-site audits.

Finished goods are checked before shipment. This includes, among other things, inspections by our own and trained staff and spot checks carried out by independent third parties. As soon as the finished

goods arrive at our warehouse in Germany, they are again subjected to a precise incoming goods inspection (e.g. visual inspections, checks for risk parameters and pRedective functions). For this purpose we have our own testing equipment available on site.

In summary, we guarantee the following points and thus ensure sustainable and comprehensive quality assurance:

- ✓ Pollutant management
- ✓ Supply chain management / development
- ✓ Audits (announced and unannounced)
- ✓ Incoming goods inspection (raw materials)
- ✓ Outgoing goods inspection (produced goods)
- ✓ Proofs and certificates by third parties (e.g. materials, BSCI, REACH, ILO)

Please do not hesitate to contact us if you have any questions or require further information..

NITRAS
SUSTAINABILITY

Do you want to get more information about **sustainability** at NITRAS? Then inform yourself **online** in our current **sustainability report!**

WE SEE THE FUTURE GREEN

Sustainability is becoming more and more important and affects every one of us - whether privately or professionally. In addition to many points that are already being promoted and implemented by us in the EU as well as in Germany, we will also ensure that this important topic receives attention along our entire value chain. In doing so, we always take appropriate measures for environmental protection as well as resource conservation and commit ourselves to comply with corresponding legal and voluntary obligations/agreements.

OUR GUIDING PRINCIPLES

We always demand the highest quality standards, which also go beyond legal requirements. To meet our quality standards, close and trusting cooperation with all our partners is imperative. To ensure this, we have developed guiding principles that define a uniform framework for this:

- ✓ Management practices that respect the rights of all employees
- ✓ Providing a safe and healthy workplace for all employees
- ✓ Provision of safe products for all partners
- ✓ Minimising negative impacts on the environment

OUR CORE STANDARDS

In addition to our guiding principles, which form the cornerstone for close and trusting cooperation, we have developed and specified core standards that complement and build on them. These can be divided into three areas:

- ✓ Social ethical aspects
- ✓ Prohibited and/or restricted substances and allergens
- ✓ Ecological sustainability

OUTLOOK

We always want to set ourselves new, realistic, but also ambitious goals in order to make the NITRAS brand even more sustainable. Our Sustainability Task Force keeps an eye on all areas of the company and explores where there is still a need for optimisation. We will keep you informed about our developments..

Do you have any suggestions or ideas for improvement? Then please feel free to contact us, we look forward to hearing from you!

PLASTIC SAVINGS THROUGH THE ELIMINATION OF INDIVIDUAL PACKAGING FOR SAFETY GLOVES

30.000 kg 

3.000 km 

Per 10,000,000 plastic bags - the mass does it!

FAST, FLEXIBLE UND MODERN

In recent years, our entire logistics as well as the warehouse have been modernised and optimised in order to be able to cope with the increasing demands on sustainability and future viability.

WAREHOUSE MANAGEMENT SOFTWARE

Our warehouse management software (WMS) serves as an interface between our ERP and AutoStore® systems. A two-dimensional barcode system helps to optimally utilise the more than 10,000 sqm of storage space capacity. For the employees, this results in optimised picking rounds and shortened walking and driving distances. The entire process, from order entry to dispatch, has been significantly improved in order to be able to react as quickly as usual in the future when incoming orders increase.

AUTOSTORE®

In order to make the best possible use of our existing storage space, we have chosen AutoStore®, an innovative system for automatic storage and picking.

Via a track system (grid), containers are picked up by high-speed robots, sorted and delivered directly to the connected port for incoming or outgoing goods. The compact storage solution reduces the space required by around 75% compared to the previous storage system. In addition to fast availability, the system is also very energy-efficient.

NEW WAREHOUSE AND OFFICE

In order to continue to meet the high demands of our partners in terms of availability and delivery times, we are expanding the existing warehouse and office space. The new building is being constructed on a site of approx. 11,400 sqm and, in addition to a modern, 16-metre-high warehouse with 10,500 pallet spaces on an area of 5,000 sqm, includes a representative showroom and a laboratory for product testing.

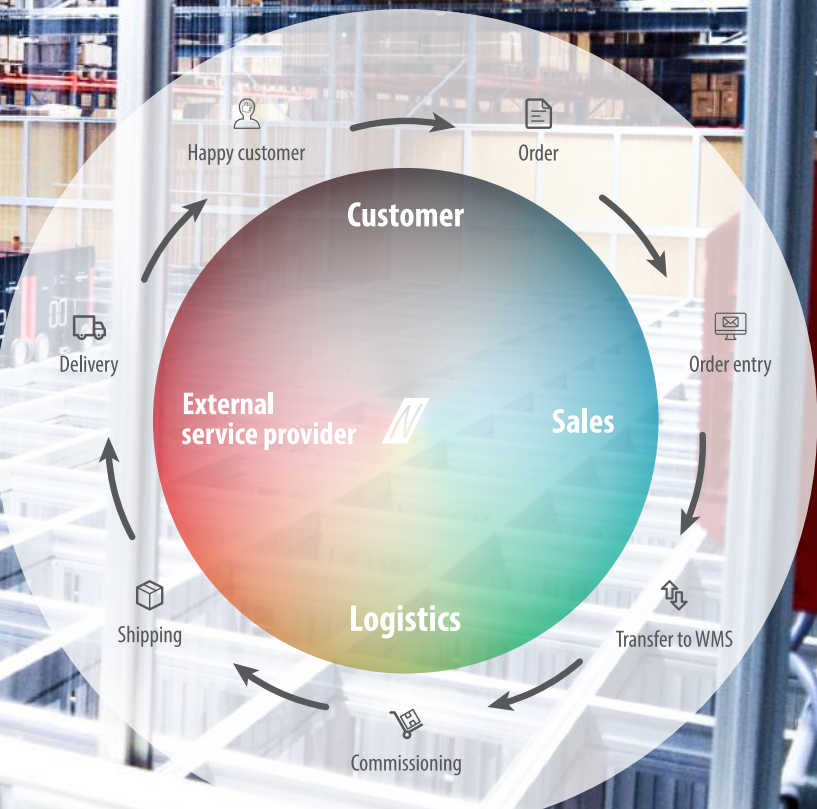

TRAINING / CONSULTING

CREATIVE SUPPORT

TEXTILE FINISHING

WE ARE HAPPY TO SUPPORT YOU AT ANY TIME

TRAINING / CONSULTING

We are also at your disposal for all topics relating to our product range, standards, certifications, material science or customer-specific documents (e.g. glove plans for your own business). Here you can benefit from our long-term experience and our trained staff.

SUPPORT OF YOUR SALES ACTIVITIES

We also support you before and after the purchase and make sure that you receive creative and technically flawless materials for your sales promotion (e.g. individual flyers, catalogues, images). So you can fully concentrate on your daily business - we take care of the rest.

WORKWEAR AND TEXTILE FINISHING

Providing all employees with uniform workwear strengthens the internal and external sense of belonging.

In many industries and professions (e.g. nursing and care services, medical practices, beauty salons, etc.) value is placed on a uniform „look & feel“. With workwear from NITRAS SAFETY, three of own transfer

presses and a large selection of transfer films, we can customise our entire range of clothing according to your wishes (e.g. polo shirts, t-shirts, jackets, jumpers) and finish and individualise it for you on site.

Whether you want your own company logo or a slogan: we help you with the creation and implementation of it. We support you with high-quality transfers and individual consulting.

Thanks to our textile finishing you and your customers benefit from the following advantages:

- ✓ Improvement of the team spirit (Corporate Identity)
- ✓ High recognition value
- ✓ Individualisation of clothing
- ✓ Upgrading of clothing

COMPETENT CONSULTING

PERSONAL MEETINGS

RELIABLE PARTNERSHIP

ALWAYS AND EVERYWHERE THERE FOR YOU

As an internationally active company for medical and non-medical disposable as well as reusable products we are a preferred partner of industry, trade and craft in over 30 countries. The competent and demand-oriented advice of our partners at domestic and abroad, our large assortment, the fair price-performance ratio as well as our fast and reliable shipping are guarantors of our mutual success - already for many years.

For personal talks on site we are at your disposal at any time to present new and existing products, to perform product trainings or to discuss general topics. Benefit from our service quality and consulting competence! Either in your premises, at trade fairs or together at your customers!

Our employees have several years of industry experience and are at your disposal in Germany, throughout Europe. For appointments and enquiries you can contact us or directly the corresponding field representative in your region:

NITRAS SAFETY - YOUR EXPERTS FOR PERSONAL PROTECTIVE EQUIPMENT AND WORKWEAR - SINCE 1986

NITRAS was founded in 1986 and has developed to an established name for personal protective equipment and workwear with the manufacturer's brand NITRAS SAFETY. After specialising in a comprehensive and strong range of hand and arm protection, the product range was steadily expanded. Currently, NITRAS SAFETY also offers a wide range of workwear, protective clothing, foot protection, respiratory protection, eye protection and children's clothing.

NITRAS SAFETY is your reliable partner for personal protective equipment and workwear. NITRAS has specialised in cooperation with technical wholesalers and supplies distribution partners in over 30 countries. To this day, both companies are owner-managed and attach great importance to the quality of our products.

Our manufacturer brand NITRAS was registered in the middle of the 90s and has developed into a renowned and reliable brand in the industry. The brand logo represents a quality mark that reflects our high standards.

You can also find more information about NITRAS SAFETY at www.nitras.de.

THE RIGHT COLOUR FOR EVERY REQUIREMENT

In the following, we provide you with a clear overview of the colour variants for our range. You will find the available colour variants for each item under the corresponding item description. Each colour code

consists of four digits. The first two digits represent the main colour and the last two digits the contrast colour. For single-colour items, the colour code „00“ (plain) forms the last two digits.

Colour	Colour code	Colour	Colour code
Uni	00	Neon yellow	40
Black	10	Neon orange	41
White	11	Lime	42
Grey	12	yellow	43
Light grey	13	Orange	44

DISPOSABLE GLOVES

- 39 Introduction
- 40 Overview disposable gloves
- 42 Vinyl disposable gloves
- 43 Latex disposable gloves
- 46 Nitrile disposable gloves
- 54 PE disposable gloves

DISPOSABLE GLOVES

Disposable gloves are indispensable and very important companions in many workplaces. They serve hygiene as well as protection and thus play a very important role in private and professional everyday life. We therefore offer a wide pallett of high-quality and versatile disposable gloves from NITRAS in four different materials that are designed to meet your requirements. Discover the advantages and possibilities of NITRAS disposable gloves for medicine, care section, food industry, tattoo, beauty and many other areas.

DISPOSABLE GLOVES FROM NITRAS

Disposable gloves are not only used for hygiene, but also for protection. They play a very important role in private and professional everyday life and, depending on the material and properties, offer different advantages that should be selected according to need for the respective situation.

We therefore offer our high-quality and versatile NITRAS disposable gloves in four different materials to suit your requirements. NITRAS offers you disposable gloves made of robust nitrile, stretchable latex, comfortable vinyl as well as hygienic disposable gloves made of polyethylene (PE). Many of our disposable gloves are available in different colours as well as designs. They meet the European requirements for medical gloves as well as for protective gloves against chemicals and microorganisms (bacteria, fungi and viruses). In addition, our disposable gloves are suitable for contact with food, which offers you a wide range of possible applications.

Thanks to these advantages, you can use our disposable gloves for your protection, for the protection of third parties and as a hygienic aid when handling sensitive working materials or food. In addition, you can also skilfully pick up on existing colour concepts in your premises and thus ensure a harmonious overall picture: may there be black disposable gloves in the kitchen or the tattoo studio or green disposable gloves in the practice or the beauty salon - with disposable gloves from NITRAS, all options are open.

BRING COLOUR INTO YOUR PRODUCT RANGE - WITH YOUR OWN PRIVATE LABEL

Whether pink, light pink, purple, lavender, green, white, blue, red, orange or (please insert your desired colour here): You determine the key facts of your private label. Thanks to private labels, you have more freedom in your pricing policy. On the other hand, private labels are the perfect way to differentiate your product range from the competition. Private labels are also a convenient way to realise product innovations that set accents and sensibly expand your own assortment.

Benefit from the advantages of your own private label and use our complete all-round carefree package if you wish. Benefit from our experience and know-how in the field of medical and non-medical disposables and reusables, so that you can concentrate fully on your business and sales.

Contact us now for your enquiry via info@nitras-medical.com or call us on +49 2272 401 111 - we look forward to hearing from you!

5690 Packaging unit: 720 pieces (8 rolls, 90 pieces each)

THE RIGHT DESINFECTION

In addition to a good combination of the right workplace equipment and accessories, the selection of different disinfections and cleanings is also enormously important.

In many areas, they are an important part of maintaining hygiene standards and avoiding infectious chains.

On the one hand, this involves personal disinfection and cleaning with skin and hand disinfection as well as soaps and washing creams, and on the other hand, it also involves the disinfection and cleaning of objects - such as inventories and surfaces.

We have these disinfectants and cleaning agents ready for you.

You will find our entire selection for disinfection and cleaning in this catalogue starting on page 55.

PRODUCT WORLDS

For many years, NITRAS has become an established brand for the specialist and wholesale trade. Our long-standing partners know that the brand stands for high-quality products and reliable processing of their orders. We also always focus on the industry focus of our partners from the medical, care, dental, tattoo, beauty and food sectors. NITRAS follows a holistic approach and offers you medical and non-medical disposable and reusable products - from a single source.

MEDICAL EDITION

Our body is a masterpiece of nature and combines a perfect interplay of skeleton, muscles, nerves and organs. We protect it as best we can from external influences. NITRAS contributes to this and provides a wide range of disposable gloves and disinfection for professional use in the practice or clinic. In addition, we have a balanced product range of disposable clothing, workplace articles and accessories with which we create holistic approaches. After a comprehensive needs analysis, we will be happy to put together a customised offer for you and help you select the disposable as well as reusable articles that are suitable and necessary for you.

CARE EDITION

Whether acute nursing care or mobile and inpatient care for people in need of care - in the entire care sector, providing people with safe and high-quality aids is enormously important. Here, disposable gloves play just as decisive a role in daily practice as highly effective disinfectants that are also gentle on people to prevent chains of infection. NITRAS covers these and other areas of care and is your reliable partner for medical and non-medical disposable and reusable products.

DENTAL EDITION

Healthy teeth and good oral hygiene are pieces of quality of life. Dental specialists, with their skills and experience, play an important role in this. In order for them to be able to concentrate on their tasks, they need a back-up that supports them comprehensively and professionally. In addition to good practice staff and modern equipment, this also includes a partner who supports them with disposable and reusable products. NITRAS takes care of this area and provides high-quality examination gloves, medical face masks and disinfection for professional use. A balanced range of hygienic papers, dental supplies and sterilisation accessories complete the portfolio.

BLACK EDITION

A tattoo artist's hands are his most important tool. Perfectly fitting and reliable disposable gloves are therefore just as important as the right machine, good light and a pleasant working atmosphere. The gloves ensure an optimal grip and a high degree of sensitivity even in long sessions. NITRAS supports you with different gloves in latex and nitrile. We act as a holistic partner and provide a wide range of accessories, such as mattress and sleeve protectors, couch covers as well as disposable clothing and paper articles, for the workplace. The portfolio is rounded off by high-quality disinfectants for all areas of a tattoo studio.

BEAUTY EDITION

Bright colours, pastel shades and colourful product photos - NITRAS is more than just a reliable partner in the medical, dental, care and food industries. Through our years of expertise, we have matured into an authentic partner in the beauty industry and cosmetics. We are your reliable partner in the provision and supply of high-quality medical and non-medical disposable as well as reusable products for your treatment environment. A selected portfolio of disposable clothing, hygienic papers and disinfection round off our holistic approach for our partners. We do our part so that you can concentrate on your customers and on comprehensive and professional treatment.

STANDARDS / PICTOGRAMS

STANDARDS / PICTOGRAMS

All performance levels, pictograms and information specified in this catalogue comply with the state as of September 2022. These are subject to change during the validity of this catalogue. Please contact us for any queries or current information. All information is subject to change.

STANDARD 100 by OEKO-TEX®

STANDARD 100 by OEKO-TEX® is an independent testing and certification system for textile raw materials, intermediate and end products at all processing stages. The tests for harmful substances include substances forbidden by law, substances regulated by law, substances known to be harmful (but not yet legally regulated) and parameters for health care.

EN 420 / EN ISO 21420

Protective gloves - General requirements and test methods

This standard defines the general requirements and relevant test procedures for glove design and construction, resistance of glove materials to water penetration, innocuousness, comfort and efficiency, marking and information supplied by the manufacturer applicable to all protective gloves.

EN 455

Medical gloves for single use

Requirements and testing for freedom from holes, physical properties, biological evaluation and shelf life determination of medical gloves for single use.

EN ISO 374

ABCDEF

Protective gloves against chemicals and micro-organisms

Requirements for protective gloves designed to protect the user against hazardous chemicals and microorganisms:

Type A: at least six test chemicals (protection index at least class 2 each)

Type B: at least three test chemicals (protection index at least class 2 each)

Type C: at least one test chemical (protection index at least class 1)

Test parameter		Classes	
A-F	Code letter for test chemicals	1-6	
Code letter	Test chemical	Code letter	Test chemical
A	Methanol	J	n-Heptane
B	Aceton	K	Sodium hydroxide 40%
C	Acetonitrile	L	Sulphuric acid 96%
D	Dichloromethane	M	Nitric acid 65%
E	Carbone disulphide	N	Acetic acid 99%
F	Toluene	O	Ammonium hydroxide 25%
G	Diethylamine	P	Hydrogen peroxide 30%
H	Tetrahydrofurane	S	Fluoric acid 40%
I	Ethyl acetate	T	Formaldehyde 37%
Breakthrough time (minutes)	Protection index	Breakthrough time (minutes)	Protection index
> 10	Class 1	> 120	Class 4
> 30	Class 2	> 240	Class 5
> 60	Class 3	> 480	Class 6

EN ISO 374

VIRUS

Protective gloves against dangerous chemicals and micro-organisms

Requirements for protective gloves designed to protect the user against hazardous chemicals and microorganisms:

Addition underneath the pictograms	Protection against
No addition	Bacteria, fungi
VIRUS	Bacteria, fungi, viruses

EN 388

Protective gloves against mechanical risks

ABCDE

Requirements, test methods, marking and manufacturer's information for protective gloves against the mechanical risks of abrasion, cut, tear, puncture and, where applicable, impact.

	Test parameter	Performance level
A	Abrasion resistance	1-4
B	Blade cut resistance (Coupe)	1-5
C	Tear resistance	1-4
D	Puncture resistance	1-4
E	Blade cut resistance (TDM)	A-F

AQL 1,5

The AQL (Acceptable Quality Level) defines a precisely procedure at which a certain subset of a good is allocated for a sample. This sample is tested according to settled standards and specifications. From the received results, it is possible to draw conclusions about the quality of the goods. The higher the requirements for a product are, the more stricter are the predefined guidelines. The AQL is therefore a statistical method for determining the quality. Medical gloves must be aseptic and must comply with DIN EN 455. An AQL (Accepted Quality Level) of less than 1.5 is to be observed. The gloves are only tested for water resistance.

Powdered

This pictogram indicates, that the related disposable gloves are powdered.

Powder-free

This pictogram indicates, that the related disposable gloves are powder-free.

For food contact

Products and items which are determined to come into contact with food.

Gauge

7 Gauge knit of gloves (coarse knit)

10 Gauge knit of gloves (average knit)

13 Gauge knit of gloves (fine knit)

15 Gauge knit of gloves (finest knit)

18 Gauge knit of gloves (finest knit +)

Premium-Quality

The quality of our products is our first priority and our whole product range is meeting our high standards. Products which have further premium features (e.g. due material selection, fitting, characteristics, finishing) are marked with this pictogram

EN 1186

Migration test

This standard specifies a guide for the selection of test conditions and test methods for total migration. This guide applies to materials and articles in contact with food.

Tested according to EN 1186

This pictogram indicates that the associated item has been tested according to EN 1186.

EN 149

Respiratory protective devices - Filtering half masks to protect against particles

Minimum requirements for filtering half masks to be used as respiratory protective equipment to protect against particles. Does not apply to escape purposes.

EN 14683

Medical face masks

This European standard defines the general requirements regarding the transition of infectious germs during surgical operations in operating rooms and other medical areas. Sources of infections can be, for example, noses and mouths of members of the operation team. The main focus for the use of medical face masks is the protection of the patient against infectious germs and in certain situations also the protection of the person wearing the masks against splashes of contaminated liquids and living particles. Medical face masks can also be worn by patients and other persons in order to prevent the spread of infections, especially in infectious and pandemic areas.

Type	Bacterial filtration efficiency (BFE)	Splashguard
I	≥ 95	No
II	≥ 98	No
IIR	≥ 98	Yes

EN 16615

4-field-test

Quantitative test method for determining the bactericidal and levurocidal effect on non-porous surfaces with mechanical action using wipes in the field of human medicine.

Association for Applied Hygiene (VAH)

The Association for Applied Hygiene is the preferred authority when it comes to quality assurance in prophylactic disinfection. The VAH certifies disinfectants and publishes these products with the most important instructions for use in its VAH list.

IHO-list of virucides

List of virus-effective disinfectants published by the Industrial Association for Hygiene and Surface Protection (IHO)

Neutral

This pictogram indicates that the associated item has a neutral scent.

Flower

This pictogram indicates that the associated item has a scent of flowers.

Lemon

This pictogram indicates that the associated item has a scent of lemons.

Neutral+ION

NEUTRAL+ION is a strongly disinfecting nature-identical active ingredient that was developed at Saarland University Hospital. The active principle is based on the human immune system, which neutralises the germs in the body in the same way with its neutrophil granulocytes. The effectiveness has been confirmed in VAH-compliant laboratory tests and products containing NEUTRAL+ION have a disinfecting and cleaning effect as well as eliminating odours and mould.

Dermatest Seal

The „Original DERMATEST®“ seal is a guarantee for the traceability of test methods and also for consumer and manufacturer safety. Products awarded this seal keep the promise of tested and confirmed quality.

EN ISO 20345

Personal protective equipment - Safety footwear

Basic and additional (optional) requirements for safety footwear used for general purpose. It includes for example mechanical risks, slip resistance, thermal risks, ergonomic behaviour.

Category	Description
SB	Basic requirements
S1	Basic requirements, closed seat region, antistatic properties, energy absorption of seat region, resistance to fuel oil
S2	Basic requirements, closed seat region, antistatic properties, energy absorption of seat region, resistance to fuel oil, protection against water penetration and absorption
S3	Basic requirements, closed seat region, antistatic properties, energy absorption of seat region, resistance to fuel oil, protection against water penetration and absorption, penetration resistance, cleated outsole

Further symbols

SRA	Slip resistance (ceramic tile floor with NaLS)	E	Energy absorption of seat region
SRB	Slip resistance (steel floor with glycerine)	WR	Water resistance
SRC	Slip resistance (SRA and SRB passed)	M	Metatarsal protection
P	Penetration resistance	AN	Ankle protection
C	Conductive footwear	CR	Cut resistance
A	Antistatic footwear	WRU	Water penetration and absorption*
HI	Heat insulation of sole complex	HRO	Resistance to hot contact
CI	Cold insulation of sole complex	FO	Resistance to fuel oil

* Upper: protection against water penetration and absorption

Shoe weight

Specifies the weight of a shoe in size 42 in grams (g).

EN 61340-4-3

Electrostatics, Part 4-3 - Footwear

This part of IEC 61340 describes a test method for determining the electrical resistance of footwear, with which the electrostatic potential on individuals is controlled. This standard is suitable for use by manufacturers of footwear as well as by end users.

DGUV Rule 112-191

Marks safety shoes which are certified to DGUV rule 112-191. These can be equipped with orthopaedic insoles which will be individually created for your feet. With a prescription from your orthopaedist, you can go to an orthopaedic shoemaker of your choice. In cooperation with our partner, the orthopaedic manufacturer Hartmann, your orthopaedic shoemaker will then be provided with the necessary material.

Partner: Matthias Hartmann Orthopädie + Sport GmbH, Schelde-Lahn-Straße 20, 35713 Eschenburg, Germany, www.hartmann-os.com

Premium-Quality

The quality of our products is our first priority and our whole product range is meeting our high standards. Products which have further premium features (e.g. due material selection, fitting, characteristics, finishing) are marked with this pictogram

Resistance to fogging

Specifies that the lenses are resistant to fogging (marking: N).

Personal eye protection

Functional requirements for different types of personal eye protection devices.

Marking of the oculars (example)

Scale number (only for filters)	Code number	Scale number
Welding filter	Without	1,2 - 16
Ultraviolet filter (the recognition of colours may be affected)	2	
Ultraviolet filter (good colour recognition)	2C	1,2 - 5
Ultraviolet filter (good colour recognition)	3	
Infrared filter	4	1,2 - 10
Sunglare filter (without infrared requirement)	5	1,1 - 4,1
Sunglare filter (with infrared requirement)	6	1,1 - 4,1

Scale number: the higher, the lower the permeability (transmittance).

Optical class

The lower, the better.	1-3
------------------------	-----

Abbreviation for mechanical strength	Mechanical strength requirements
Without	Minimum robustness
S	Increased robustness
F	Protection against high speed particles (low energy impact)
B	Protection against high speed particles (medium energy impact)
A	Protection against high speed particles (high energy impact)

Marking of the frames (example)

	AS	EN 166	F
Identification mark of the manufacturer			
Number of this standard			
Abbreviation for increased mechanical strength / rotection against high speed particles / extreme temperatures			

EN 170

Ultraviolet filter

Scale numbers and transmission requirements for protective filter against ultraviolet radiation.

Scale number	Colour recognition	Typical usage
2-1,2	May be affected if not marked with scale number 2C.	For use with radiation sources that predominantly emit ultraviolet radiation with wavelengths shorter than 313 nm and where glare is not an essential factor. This covers the entire UV-C and most of the UV-B range.
2-1,4		
2-1,7		
2-2	May be affected if not marked with scale number 2C.	For use with radiation sources that emit intensive radiation in the UV range and visible spectral range and where a weakening of the visible radiation is therefore required.
2-2,5		
2-3		
2-4		
2-5		

EN 172

Sunglare filters for industrial use

Scale numbers, transmission levels and corresponding requirements for sunglare filters for industrial use.

Scale number	Usage	Designation
5-1,1	This scale number applies only to certain phototropic sunglare filters in a bright state and for the range of high luminous transmission of graduated filters.	
6-1,1		
5-1,4	As a very bright filter.	Very bright
6-1,4		
5-1,7	As a bright filter.	Bright
6-1,7		
5-2	As a recommended universal filter, usually easy to use.	Medium
6-2		
5-2,5	Mostly used in Central Europe.	Dark
6-2,5		
5-3,1	In the tropics and subtropics, for sky observations, in high mountains, snow areas, bright water areas, sandy areas, lime quarry and chalk quarry.	Very dark
6-3,1		
5-4,1	Only at extreme irradiances.	Extreme dark
6-4,1		

UV 400 protection

EN ISO 23907

Protection against cuts and stabs - Requirements and test methods - Sharps waste containers

Specifies requirements for disposable sharps containers intended to contain potentially dangerous medical waste sharps or items without stab and cut protection, for example scalpel blades, trocars, hypodermic needles and syringes. This standard covers sharps containers supplied complete by the manufacturer and those supplied in component parts to be assembled by the user.

APPLICATION GUIDE

The application examples given on the following pages merely act as a rough overview in order to outline which hand / arm protection is suitable for which application. All hand / arm protections are partly suitable for other applications as well. Further subjective user preferences (e.g. material, breathability, type of coating, etc.) are not considered. This guide can not and should not replace personal advice. Furthermore the selection of the right hand / arm protection has always to be performed with regard to the risks at the workplace. For further information please do not hesitate to contact us.

BRANCH: Construction / mechanics / sanitary area

Demands (i. a.): high mechanical resistance, high abrasion, durability, high dexterity, where required liquid-tight with long cuff

Applications: industry, mechanical engineering, repair, gravel plant, quarry, craft, polymer processing, exhibition stand construction, metal working, waste processing, recycling, carpenter, road construction, scaffolder, stone processing, wood processing, sanitary area, waterworks, sewage plant, cleaning, agriculture, welding etc.

BRANCH: Chemistry / laboratory

Demands (i. a.): liquid-tight, preferably long cuff, protection from chemicals, highest dexterity, perfect fit

Applications: chemical industry, laboratory, cleaning, sanitary area, recycling, waste disposal, waste processing etc.

BRANCH: Landscape gardening

Demands (i. a.): perfect grip, protection against dirt and moisture, high dexterity

Applications: landscape gardening, agriculture, garden centre, craft, garden work etc.

BRANCH: Foodstuff

Demands (i. a.): highest dexterity, perfect fit, suitable for food contact

Applications: food processing, kitchens, canteens, food production, agriculture etc.

BRANCH: Automotive manufacturing

Demands (i. a.): high dexterity, perfect grip, perfect fit, high or very high cut protection

Applications: automotive industry, supplier, ship building, tire trading, tire production, repair services, workshops, welding etc.

BRANCH: Commissioning / shipping

Demands (i. a.): highest dexterity, perfect grip, high breathability

Applications: shipping, logistics, transport, commissioning, sorting, etc.

ADVANTAGE: Protection against minimal / medium risks

Protective gloves, which are marked with this pictogram are characterised by a robust design and protect the user from minimal and/or mechanical risks.

ADVANTAGE: Sensitive

Protective gloves, which are marked with this pictogram are characterised by a very high sensitivity and dexterity. Due to that they are perfect for working with small parts.

ADVANTAGE: Non-slip / grippy

Protective gloves, which are marked with this pictogram are characterised by a very high slip resistance and a perfect grip on many surfaces.

ADVANTAGE: Protection against heat and/or cold

Protective gloves, which are marked with this pictogram are characterised by protection against high and/or low temperatures and are therefore perfect for working under more difficult climatic conditions (welding, cold stores, in winter etc.).

ADVANTAGE: Antistatic

Protective gloves, which are marked with this pictogram protect the user and sensitive parts from unintended and uncontrolled electrostatic discharges.

ADVANTAGE: High / very high cut protection

Protective gloves, which are marked with this pictogram protect the user from high or very high risks by cutting injuries.

COLOUR GUIDANCE SYSTEM

The colour guidance system enables direct recognition of the sizes by means of the different colours on the edges of the boxes.

Size	XS	S	M	L	XL	XXL
Colour						

GUIDE: COATINGS AND MATERIALS

Gloves are available for a wide variety of applications (e.g. protection against cuts, heat, cold or chemicals). The materials and the coating play a major role in what protective gloves can be used for. In the following we summarise the basic advantages and properties of the most important coatings and materials.

ADVANTAGES / PROPERTIES / APPLICATIONS

LA	Latex Very good dry and wet grip, very flexible and stretchable, very elastic, very tear-resistant, very good tactile sensitivity, perfectly suited for workplaces that require very good grip (handling smooth and / or slippery objects or surfaces)
NI	Nitrile Resistant, robust, very good dry and oil grip, very high mechanical resistance, very high abrasion resistance, resistant to oils and greases, perfectly suited for workplaces with high demands on durable and abrasion-resistant protective gloves
PPU	PPU Very flexible, very good dry and wet grip, high mechanical resistance, durable and robust
PU	PU Good abrasion resistance, very sensitive, very good tactile sensitivity, perfectly suited for workplaces with high demands on the dexterity of the protective gloves
PVC	PVC Robust, high mechanical resistance, light and aging resistant, high abrasion resistance
SC	Special coating Very abrasion-resistant, breathable, very non-slip, very good dexterity, perfectly suited for workplaces with high demands on mechanical resistance and dexterity of the protective gloves

ADVANTAGES / PROPERTIES / APPLICATIONS

CH	Chloroprene Very elastic, flexible, resistant to oils and greases, resistant to acids, alkalis and solvents, perfectly suitable for workplaces with chemical contact
VI	Vinyl Soft, elastic, very sensitive, smooth surface
SL	Split leather Durable, robust, good grip, perfectly suited for workplaces with requirements for resistant protective gloves
GL	Grain leather Resistant, tear-proof, durable, robust, smooth surface, soft, sensitive, perfectly suited for workplaces with requirements for resistant protective gloves
AL	Artificial leather Robust, moisture-repellent, sensitive
UC	Uncoated Very flexible, very sensitive, high wearing comfort, very breathable, perfectly suitable as undergloves and for workplaces with minimal risks and very high demands on the dexterity of the protective gloves

APPLICATION GUIDE

The application examples given on this page merely act as a rough overview in order to outline which safety shoes are suitable for which application. All safety shoes are partly suitable for other applications as well. Further subjective user preferences (e.g. material, breathability, outsole) are not considered. This guide can not and should not replace personal advice. Furthermore the selection of the right safety shoes has always to be performed with regard to the risks at the workplace. For further information please do not hesitate to contact us.

ADVANTAGES / PROPERTIES / APPLICATIONS

SB

Advantages / properties (e.g.): toe cap, light-weight, flexible, possibly very breathable as the seat region can be open, for dry working environments
Applications (e.g.): workplaces with a small number of different risks, danger from impacts or from falling objects (e.g. hospitals, care facilities, food industry, canteens)

S1

Advantages / properties (e.g.): toe cap, closed seat region, light-weight, breathable, for dry working environments
Applications (e.g.): as SB, additionally with closed seat region (e.g. commercial driver, logistics, commissioning)

S2

Advantages / properties (e.g.): toe cap, closed seat region, upper protects against water penetration and absorption
Applications (e.g.): as S1, protection against water penetration and absorption (e.g. laboratory, industrial kitchens)

S3

Advantages / properties (e.g.): toe cap, closed seat region, upper protects against water penetration and absorption, cleated outsole, protection against penetration of sharp and edged objects
Applications (e.g.): as S2, risk of penetration by sharp / edged objects (e.g. construction, waste management sector, landscape gardening)

CI

Advantages / properties: voluntary additional requirement for cold insulation of sole complex
Applications (e.g.): workplaces with cold surroundings / surfaces (e.g. cold stores, winter service)

HI

Advantages / properties: voluntary additional requirement for heat insulation of sole complex
Applications (e.g.): workplaces with warm surroundings / surfaces (e.g. road construction, metal working)

HRO

Advantages / properties: voluntary additional requirement for resistance of outsole to hot contact (300° C)
Applications (e.g.): workplaces with hot surfaces (e.g. tar work, road construction)

ADVANTAGES / PROPERTIES / APPLICATIONS

P

Advantages / properties: protection against penetration of sharp and edged objects (e.g. S1P)
Applications (e.g.): workplaces with risk of penetration by sharp / edged objects (e.g. nails, metal pieces)

Advantages / properties: sensitive products are protected from damage and electrostatic charges are discharged in a controlled manner
Applications (e.g.): workplaces with sensitive products (e.g. electronics, engineering)

SRA

Advantages / properties (e.g.): slip resistance of the outsole, which is determined and classified on the basis of two test situations (SRA: ceramic tiles with NaLS, SRB: steel floor with glycerine, SRC: SRA and SRB passed)

SRB

SRC

Applications (e.g.): workplaces with risks from damp or greasy surfaces and floor coverings (e.g. scaffolding, construction, workshops, industrial kitchens, canteens)

MF

Advantages / properties (e.g.): toe caps and perforation resistant midsoles of metal-free safety shoes are usually lighter and more flexible than safety shoes that contain metal and they are hardly / not thermally conductive. Metal-free perforation resistant midsoles also cover a larger area of the foot (insole), but are more influenced by the shape of sharp objects (e.g. diameter, geometry, sharpness). Perforation resistant metal midsoles are less influenced by the parameters mentioned above and therefore offer a particularly high level of protection. It should be noted here that, due to the design, only a smaller area of the foot can be protected.
Applications (e.g.): workplaces with danger from edged / sharp objects lying around (e.g. nails, metal parts) as well as danger from impacts or falling objects, at workplaces with the highest demands on the protective functions, we recommend the use of S3 safety shoes with steel midsole and steel toe cap (e.g. construction, outdoor work)
